

Advising Notes – BAEN

Preregistration for Spring 2018

Everyone	<ul style="list-style-type: none">• The student advising period will be October 30-November 10. Students need to schedule an appointment to see their faculty advisors during this time. Many faculty will post sign-up sheets for advising appointments outside their office door and some use an online appointment booking system. Some faculty may not be available these exact dates.• Student files will be sent to faculty advisors prior to advising appointments. Students do NOT need to pick up their folders.• BAEN courses (except BAEN 320) are offered only once per year. Students need to take all required BAEN courses offered in the spring for which they have completed the prerequisites but which they have not yet taken. If there is a time conflict, the lower level course should be taken.• Students must take ENGL 210 to fill the second communication requirement – check the restrictions and details hyperlink for the sections reserved for engineering majors only (typically the last 8-10 sections listed).
Blocks	<ul style="list-style-type: none">• All students: There is a hold placed on your account until you have seen your faculty advisor (NOT Ashlea).• If you are below a 2.0 GPR at mid-semester, you will be allowed to pre-register; however, your registration may be cancelled if final grades are not sufficient to warrant continuation. Being allowed to pre-register does NOT imply automatic continuation for the next semester.
Advising and registration procedures	<ul style="list-style-type: none">• Schedule a time to meet with your advisor during the 2 week advising time.• Read this advising memo and note items that affect you.• Be familiar with your degree plan (use the degree planner in Howdy) and have a preliminary schedule for the spring worked out before the advising meeting. If courses will be taken at another institution and transferred for credit, check with Ashlea regarding compatibility and indicate which courses and the institution on the advising form.• Check your degree audit on Howdy (MyRecord tab, degree evaluation). All courses taken at TAMU or other institutions should be shown. Some courses may be listed in the “Work not applied” area if we have not submitted an adjustment. If a course you took at another institution is not showing anywhere on the audit, then TAMU has not received a transcript for it.• During your assigned registration time that is distributed by the Registrar’s Office, register for the courses recorded on the advising form during your advising meeting. If you need to change these courses, consult with Ashlea.
Grade requirements	<ul style="list-style-type: none">• You are required to make a grade of C or better in all engineering, math, and science courses, the technical elective, as well as ENGL 104, for them to count toward your degree. Any of these courses in which you make a D or F must be retaken as soon as possible and must be completed successfully before proceeding to any course for which it is a prerequisite.• If you make a D or F this fall, you likely will have to change your spring schedule before classes start.

Prerequisites	<ul style="list-style-type: none"> • Prerequisite courses are required to ensure students have the necessary background material on which the follow-on course builds. • Prerequisites are required for all of our upper level departmental courses. Failure to complete prerequisite courses in a timely manner may lead to postponement of graduation. In exceptional circumstances, a prerequisite may be waived with the consent of the instructor and advising coordinator (Dr. Smith). If you wish to take a departmental course without having the prerequisites, you MUST fill out the departmental petition, which you can get from Ashlea, obtain the indicated permissions, and return to Ashlea. • If you Q-drop a prerequisite for a departmental course, you will not be allowed to take the following departmental course concurrently with or prior to that prerequisite.
U1, U2 and Transfer Students	<ul style="list-style-type: none"> • BAEN 201 is a REQUIRED course in the spring for all new BAEN students (anyone who transferred into the program after January 2017). • If you are registering for MEEN 221 or have completed it, you should take BAEN 301 this spring. • MEEN 222 and MSEN 222 are cross-listed classes. Either will cover the requirement in the BAEN curriculum. • You need to complete CVEN 305 this spring or summer if you plan to take BAEN 375 next fall (MEEN 221 is a prerequisite for this course).
Honors	<ul style="list-style-type: none"> • There are several opportunities to enroll in departmental honors courses: <ul style="list-style-type: none"> ○ BAEN 201-200 ○ BAEN 320-201 ○ Other classes per discussion with the professor
U3 and U4 Students	<ul style="list-style-type: none"> • Departmental elective courses offered this spring include BAEN 412 (hydraulic power), 427 (packaging), 431 (fundamentals in bioseparations) 465 (biological waste treatment systems), 468 (soil and water conservation), and 469 (water quality engineering). • Our department does NOT give academic credit for completing an internship. We do offer a 0 credit option of BAEN 484. Please contact Ashlea to register for this course and obtain the required paperwork before enrollment. • Recommended electives for various emphasis areas are available on the departmental web site: http://baen.tamu.edu/academics/undergraduates/degree-programs/
Study Abroad	<ul style="list-style-type: none"> • BAEN 460 and 465 will be offered during 2018 Summer II in the Belgium Environmental Science and Engineering study abroad program. In addition to receiving course credit for these two classes, students participating in the program will receive 6 hours of International and Cultural Diversity credit or may apply the credit toward the International Engineering Certificate.
Minors	<ul style="list-style-type: none"> • A new 15 hour minor in MSEN is available. https://engineering.tamu.edu/materials/academics/degrees/undergraduate/minor • This minor will accept BAEN 354 and BAEN 427 as technical electives. 2 MSEN courses can count towards your engineering/technical electives for BAEN, which just leaves 3 hours that are not applicable to the BAEN degree requirements.

<p style="text-align: center;">Core curriculum requirements</p>	<p>Students are placed in the catalog that was in effect when they started college here or at another institution or in a later catalog. Listed below are differences in core curriculum requirements by catalog:</p> <ul style="list-style-type: none"> • Catalog 129 - requires 2 years high school foreign language, one visual and performing arts, one social and behavioral sciences, POLS 206 and 207, two American histories, one KINE 199 (S/U), and one KINE 198 (graded or S/U). Additionally, 6 hours of International and Cultural Diversity (ICD) courses (that can be selected to meet other curriculum requirements) and one writing intensive (W) course are required. • Students in Catalog 130 and later have the same core curriculum requirements as Catalog 129 except that two writing intensive (W) courses are required. • Catalog 137 (2014-2015) and beyond (up to 2017-2018) have name changes for core curriculum (now Creative Arts; Language, Philosophy and Culture), and do not require KINE 198/199. All other components remain the same. Please refer to http://core.tamu.edu to ensure you are taking appropriate courses for the newest catalogs. • Writing intensive courses are identified by section numbers in the 900s. ENGR/PHIL 482 and BAEN 480 are approved as W courses. • Selecting International and Cultural Diversity courses that do not also meet another core curriculum requirement will increase the total number of hours required to graduate.
<p style="text-align: center;">Certificate Programs</p>	<p>The College of Engineering offers several certificate programs that may be of interest to BAEN students:</p> <ul style="list-style-type: none"> • Engineering Therapeutics Manufacturing – requires BAEN 302, BAEN 431, BAEN 471, and BAEN 479. • Business Management Certificate – requires completion of an intensive 120-hour course held during three weeks in the summer each year. • Energy Engineering Certificate – requires a minimum of 6 credits in addition to the BAEN curriculum. • Engineering Project Management Certificate – requires a minimum of 6 credits in addition to the BAEN curriculum. • Safety Engineering Certificate – requires a minimum of 6 credits of SENG courses in addition to the BAEN curriculum. • International Engineering Certificate – potentially applicable to students participating in BAEN Study Abroad program and would require an additional 6 credits of ICD courses and 6 credits of 200 level or above foreign language. <p>More information on the various certificate programs can be found on their website: http://engineering.tamu.edu/academics/certificates</p>
<p style="text-align: center;">Faculty</p>	<ul style="list-style-type: none"> • Use the advising forms to record what courses the student will take and to indicate that the student should be unblocked. These forms are kept in the student's file. • Include the UIN (Universal ID Number) on the advising form. • Identify the curriculum and emphasis area, if applicable, that each student plans to follow. Note that emphasis areas are developed by selection of appropriate engineering electives. Recommended electives for emphasis areas are available in the advising notebook and on the departmental web site. • Send student files back to Ashlea to have the advising holds removed from student's accounts. • If you request a student be unblocked by email, also send an advising form so it can be included in the student's file.
